Early Start Acceptance Form for Engineering ATAR 2023

The practical component of the course requires students to commence class before school. This gives the class a double period timeslot (period 0 and period 1) in which to process the more complicated parts of the program. This in turn should allow for better educational outcomes for your child. I cannot stress the importance and distinct advantages this allows in the practical aspects of the Engineering course.

Their timetable has a class moved from period 5 to period 0 to allow this to occur. This frees up that period 5 timeslot for private study, or indeed the students can leave early after period 4. If this becomes the case, they are provided with an Early Leave Pass for that one day.

If you require any further information, please do not hesitate to contact me.
