**Period 0 Acceptance Form for ATAR Engineering 2021**

The practical component of the course requires students to commence class before school. A class is moved from Period 5 to Period 0 which begins at 7.35 am. This would give the class a double period timeslot (period 0 and period 1) in which to process the more complicated parts of the program. This in turn should allow for better educational outcomes for your child. I cannot stress the importance and distinct advantages this allows in the practical aspects of the Engineering course.

It would also mean that they could either leave school at lunch two when they have this class Period 5 or make arrangements for private study. Students will be issued with an Early Leave pass for this day.

If you require any further information, please do not hesitate to contact me.
