SCHOOL BUSINESS PLAN
TO IMPROVE TEACHING & LEARNING

DEDICATED TO STUDENT LEARNING

2012 - 2014
Dedicated to:

Excellence
Respect
Perseverance
Learning
INSPIRE TO ASPIRE

TO IMPROVE TEACHING & LEARNING

This plan is underpinned by our vision and values. The development of strategies is directed by our School Wide Pedagogy. Learning Areas will unpack and plan strategies for classroom implementation in their teaching and learning programs and Operational Plans. Staff will be given the opportunity to collaborate and share across learning areas. Teachers will form Professional Learning Communities that have a strong focus on improved teaching and better student results. Data evidence is the assessment tool to measure the implementation of teaching/learning strategies and learning improvements.
This school plan for Mount Lawley SHS has been generated through, the self-assessment process and the response to the Standards Review and earlier School Reviews undertaken by the previous office of Director, Schools. This process is designed to improve schools and the programs that are offered and hence, enhance student learning. The Plan for Mount Lawley SHS has been generated through a consultative whole-school approach including all stakeholders, such as parents. It has been refined through a number of processes involving staff and community. This is generated through the concept of Parallel Leadership where teachers take responsibility for improvement and the development of a positive school culture through the whole-school approach to teaching and learning that drives the improvement strategy. Professional Learning Communities of teachers will prosper, as an important strategy for improving student results.
SCHOOL VISION

INSPIRE TO ASPIRE

Mount Lawley Senior High School aims to maximise the enjoyment of learning and achievement for all students within a compassionate and democratic school culture, encouraging them to be responsible, creative and engaged lifelong learners.

SCHOOL WIDE PEDAGOGY

We connect our authentic learning experiences to life
We develop higher-level thinking
We are motivated and responsible for our own learning and actions
We cater for individual differences
MOUNT LAWLEY SENIOR HIGH SCHOOL 2012-2014

Mount Lawley Senior High School will be a learning community committed to providing an inclusive, caring and supportive environment where excellence and academic achievement are valued. Students will be challenged to achieve their potential through rigorous programs focused on building the knowledge, skills and values for a productive life as a member of society.

Mount Lawley SHS will continue to offer a variety of pathways to meet the needs of students. It is a school with a long standing reputation for delivering effective teaching and learning and shaping the leaders of tomorrow. The school boasts an impressive alumnus and has an enviable reputation in the wider community as one of Western Australia’s premier public schools.

The leadership and representational skills of students will be enhanced through academic, creative and sporting pursuits and participation in the Student Council and school and community forums. Students will be positioned to take their place in a vibrant, cosmopolitan and democratic Australia. Through being part of a diverse school community, students will be understanding, and welcoming, of difference. They will be able to engage effectively with different cultural groups.

By graduation, students will be well prepared to face the unknown challenges of the future. The school seeks to:

• Engage students in authentic real world learning experiences beyond the classroom with opportunities for students to become leaders and active participants in effecting change. This will mean expanding networks and partnerships.

• Offer opportunities to develop students application of technology and a critical understanding of its use.

• Foster a sense of place, with an appreciation of Australia’s traditions and past, including its indigenous heritage.

• Develop students’ understandings of Australia’s relationship with Asia, its place in the global economy and sustainability.

The school also aims to ensure that students have an awareness of social justice principles and demonstrate respect for others. They will have a social conscience and be provided with the opportunity to assist those less fortunate whether at home or abroad.

The school regards staff, both teaching and support, as the foundation upon which excellence in school programs is built. Staff are enablers to better student results. Staff will be treated with consideration, have access to and pursue relevant professional development and participate in effective performance management. The professional development of staff will impact on, and inform, improved classroom practice and lead to enhanced student outcomes.

Teachers, within the various teaching teams across the school, will be part of a professional learning community and participate in professional conversations about learning and professional growth leading to better student results.

Staff are expected to have high expectations for their students and engage effectively with parents. There should be “no surprises” at reporting times. Parents will be provided with comprehensive advice about student pathways and the opportunity to work with school staff in managing student issues.

Parents will be provided with opportunities to contribute to school forums, including aspects of the school’s decision-making processes. The expertise that parents can bring to the school’s operations and to the educational process is valued and actively sought. Parents will continue to be encouraged to participate in school forums such as the Parents and Citizens Association and its committees and the School Board and contribute in other ways that enhance student opportunities.

Mount Lawley Senior High School will continue to strive to create a positive and welcoming school community and form a constructive and important part of its students’ development into successful adults. It is a good school that strives to be a great school. Mount Lawley Senior High School aims to make a difference for its students. On leaving the school they will be able to reflect on their learning journey and affirm with pride “I am a graduate of Mount Lawley Senior High School – a place of learning excellence”.

This plan charts the journey.

Dedicated to: Excellence • Respect • Perseverance • Learning
The Mount Lawley SHS Business Plan is underpinned by the Department of Education’s strategic plan, “Excellence and Equity 2012-2015”. The priorities outlined in the Department’s plan are:

- Success for all students.
- Distinctive schools.
- High quality teaching and leadership.
- A capable and responsive organisation.

Additionally, school planning at the operational level is strongly guided by the relevant Focus objectives. A Focus document is released annually.

The School Business Plan is also intrinsically aligned to the Director General’s Classroom First Strategy. The goal is a strong public school system – a public school system that earns the respect of the community for the quality of the education it offers. The key features of Classroom First are:

The public school system will be strong if we work at making:

- every public school a good school; We want our schools to provide a safe and welcoming environment with programs that challenge and engage their students.
- every teacher an effective teacher; We want our teachers and support staff to have access to the support they need so they approach their work with confidence, enthusiasm and commitment.
- every student a successful student. We want all our students to leave school well prepared for their future, equipped to prosper economically, be happy and secure in themselves, and ready to contribute to their community.

There are six key elements of the Classroom First Strategy:

1. A focus on student achievement: success for all.
   Teachers’ attention will be focused on the standards of achievement expected of students and on monitoring the progress of students towards those standards.

   It is the quality of what goes on between the teacher and their students that counts.

   The strategy seeks to put in place distinctive schools each located in a specific context.

4. Practical support: making it possible.
   Support resources will be allocated to the school in a flexible form so each school can decide on the particular support it requires.

5. Meaningful accountability: asking the hard questions.
   School accountability mechanisms should serve educational purposes.

   This element of the strategy is directed at having our schools highly regarded by the community.

The intent of this Plan is to make a good school a great school

The school’s model for undertaking self-assessment and the ongoing quest to be a great school is outlined below. The intent of the School Business Plan is to improve student outcomes through better teaching and learning and alignment of resources.

The school’s planning process can be summarised as:

- The plan is a long term strategy to shape improvement and cultural change.
- The intent is to deliver high standards of student achievement.
- From the School Business Plan, a series of whole-school operational plans and learning team plans will be developed. There is an expectation that teachers will align classroom planning with the goals of the strategic and operational plans.
- Additionally, teacher performance management is to be linked to the plans.
- The plan is consistent with Departmental policies and procedures associated with accountability, performance management, corporate governance, resource allocation and school improvement.
1. EXCELLENCE

The school operates so that all members of the community strive to achieve outstanding academic and non-academic outcomes. The school operates so that all members of the community achieve academic, sporting, cultural, citizenship and social growth as individuals.

2. RESPECT

The school operates so that all members of the community treat each other decently and value communal and individual property. The school operates so that all members of the community are treated with dignity and individual difference is appreciated.

3. LEARNING

The school operates so that all members of the community develop a great interest in learning, including learning after school and for whole of life.

4. PERSEVERANCE

The school operates so that all members of the community never give up and try hard at tasks, even those that are difficult, time consuming or new.
The following priorities have been identified for the triennium.

1. BETTER ACADEMIC ACHIEVEMENT

2. PEDAGOGY – IMPROVED TEACHING ENABLING LEARNING

3. STUDENT WELLBEING

4. PARTNERSHIPS
1. Better Academic Achievement
Students will value learning and strive to achieve results commensurate with their ability. Staff will have high expectations, encourage students, reward achievements and effort and celebrate. Families will have access to quality counselling and students provided with relevant pathways. Attendance at school will be valued and students will appreciate academic achievement as worthwhile.

2. Pedagogy: Improved Teaching Enabling Learning
Teachers will participate in professional learning in order to improve teaching in the school. An important strategy is staff engagement in professional learning communities with a focus on better student results. Teachers will also enhance skills in using technology and embed the Australian Curriculum in school operations. Through improved teaching students will be placed better to develop key learning skills and achieve improved results.

3. Student Wellbeing
The school will be regarded as a place where all are welcomed and staff and students treat each other with courtesy and bullying is rejected. Staff and students acknowledge and are accepting to difference and demonstrate respect to each other and to personal and school property. All will accord respect to the grounds and buildings of the school.

4. Partnerships
The school will seek out and nurture mutual obligation partnerships where others can add value to school programs. These networks will include service clubs, the business sector and government agencies. Parents will be well informed about their child’s progress and achievement and work with staff as partners.
### PRIORITY 1 BETTER ACADEMIC ACHIEVEMENT

Students will value learning and strive to achieve results commensurate with their ability. Staff will have high expectations, encourage students, reward achievements, effort and celebrate. Families will have access to quality counselling and students provided with relevant pathways. Attendance at school will be valued and students will appreciate academic achievement as worthwhile.

<td>100% of students achieving English competency for University entrance.</td>
</tr>
<tr>
<td></td>
<td>Median ATAR of 79 is achieved by 2014.</td>
<td>Median ATAR achieved 81 by 2014.</td>
</tr>
</tbody>
</table>
Research is clear that the most significant school impact on student learning is the teacher. In order to improve the quality of teaching and learning at the school, learning area teams will adopt the framework of a Professional Learning Community. Level 3 curriculum leaders, inculcated in the approach in 2011, will lead these communities. They will engage a range of strategies such as professional conversations, coaching and mentoring and teacher skill in utilising technology. A variety of pedagogical styles will form part of the professional learning for staff along with the Department’s CMIS strategy. The Australian Curriculum will become a focus of professional learning. Through teacher professional learning, students will develop improved literacy skills across all learning areas and recognise the skills of reading, writing, listening and speaking as key learning tools. In particular, the capability to write for a variety of audiences and purposes will be valued and developed. Teachers will be prepared through professional development to utilise technology as a learning tool in class, enabling student utilisation across learning areas.

### PRIORITY 2  PEDAGOGY: IMPROVED TEACHING ENABLING LEARNING

</tr>
</tbody>
</table>
Student Wellbeing

**Priority 3: Student Wellbeing**

The school will be regarded as a place where all are welcomed and staff and students treat each other civilly. Violence is not seen as a legitimate solution to problems with bullying, drug use and other substance abuse being rejected. Staff and students acknowledge and are accepting of differences and demonstrate respect to each other and to personal and school property. All will accord respect to the grounds and buildings of the school and graffiti, damage and rubbish will be minimised.

<td></td>
</tr>
</tbody>
</table>
### PRIORITY 4 PARTNERSHIPS

The school will seek out and nurture mutual obligation partnerships where others can add value to school programs. These networks will include service clubs, the business sector and government agencies. Parents will be well informed about their child’s progress and achievement and work with staff as partners. We seek to improve links to external providers and organisations and the community (real world connections). We also seek international opportunities through sister schools and language and cultural education.

</table>
AUSTRALIAN CURRICULUM STATEMENT

Increasingly, in a world where knowledge itself is constantly growing and evolving, students need to develop a set of skills, behaviours and dispositions, or general capabilities that apply across discipline content and equip them to be lifelong learners able to operate with confidence in a complex, information-rich, globalised world.

The Australian curriculum includes a focus on seven general capabilities (literacy, numeracy, information and communication technology competence, critical and creative thinking, ethical behaviour, personal and social competence and intercultural understanding) and three cross curriculum priorities (Aboriginal and Torres Strait Islanders histories and cultures, Asia and Australia’s engagement with Asia and Sustainability). These have been embedded where relevant and appropriate in each learning area and can be viewed explicitly in the curriculum online.

Aboriginal and Torres Strait Islander Histories and Culture
The Aboriginal and Torres Strait Islander priority provides opportunities for all learners to deepen their knowledge of Australia by engaging with the world’s oldest continuous living cultures. This knowledge and understanding will enrich their ability to participate positively in the ongoing development of Australia.

Asia and Australia’s engagement with Asia
China, India and other Asian nations are growing rapidly and the power and influence they have in all areas of global endeavour is extensive. An understanding of Asia underpins the capacity of Australian students to be active and informed citizens working together to build harmonious local, regional and global communities, and build Australia’s social, intellectual and creative capital.

Sustainability
Sustainability addresses the ongoing capacity of Earth to maintain all life. Sustainable patterns of living meet the needs of the present without compromising the ability of future generations to meet their needs. Actions to improve sustainability are both individual and collective endeavours shared across local and global communities. They necessitate a renewed and balanced approach to the way humans interact with each other and the environment.

Education for sustainability develops the knowledge, skills and values necessary for people to act in ways that contribute to more sustainable patterns of living. It is futures-oriented, focusing on protecting environments and creating a more ecologically and socially just world through action that recognises the relevance and interdependence of environmental, social, cultural and economic considerations.
